and Diversification

Navigating New Horizons

The DMADD team carries out monthly workshops named 'ThursdayTraining'. These short trainings aim to facilitate knowledge sharing among its members. The sessions are planned to be conducted on the last Thursday of every month.

The primary objective of these workshops is to enhance mutual understanding and upskilling among team members, ultimately contributing to the achievement of the project's overarching goals. The D'MADD team will share insights related to their work as well as have the chance to impart valuable experiences and life lessons that could benefit the entire team.

This initiative not only promotes professional growth but also strengthens the bonds within the DMADD team, setting a positive tone for collaborations and teamwork.

Principles of Success

26th October 2023

The inaugural session held on 26th October 2023 was met with enthusiasm as team members seized the opportunity to delve into their respective fields of expertise.

The workshop commenced with an insightful presentation by Dr. Ibrahim Waheed, who elaborated on the principles of success.

Finance Management Specialist

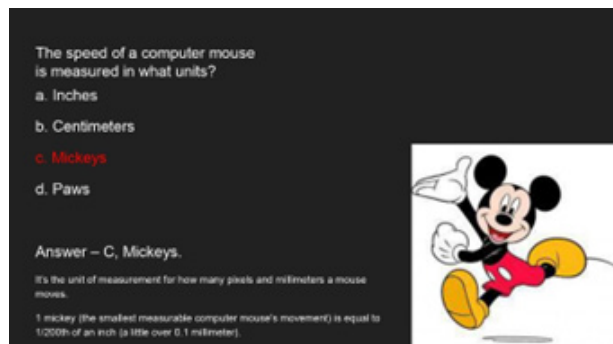

Trivia

26th October

The training session took an exciting turn with a General Knowledge Trivia Quest. The rules were simple: teams had to buzz in to answer, and the first team to buzz was given 15 seconds to answer the question.

The trivia covered a wide range of topics, from animal facts to computer knowledge, food trivia to historical facts, and even some fun facts

about insects and pandas! Here are some new knowledge.

- Did you know that snails can hibernate up to

3 years, making them the animal that hibernates the longest?

- The speed of a computer mouse is measured in 'Mickey's', a unit of measurement for how many pixels and millimeters a mouse moves.
- Honey is the only food that never goes bad. Archaeologists found 3,000-year-old honey in Egypt that was still edible!

- The first laptop computer was the Osborne 1, invented by Adam Osborne in 1981.
- A group of pandas is commonly called an 'embarrassment'.
- The blood of mammals is red, the blood of insects is yellow, and the blood of lobster is colorless. However, when the blood of a lobster is exposed to oxygen, it appears blue.

The trivia quest was not only fun but also an educational experience, providing participants with interesting facts and knowledge. It was a great way to break the ice and encourage team bonding
