Navigating New Horizons

The DMADD team carries out monthly workshops named 'ThursdayTraining'. These short trainings aim to facilitate knowledge sharing among its members. The sessions are planned to be conducted on the last Thursday of every month.

The primary objective of these workshops is to enhance mutual understanding and upskilling among team members, ultimately contributing to the achievement of the project's overarching goals. The D'MADD team will share insights related to their work as well as have the chance to impart valuable experiences and life lessons that could benefit the entire team.

This initiative not only promotes professional growth but also strengthens the bonds within the DMADD team, setting a positive tone for collaborations and teamwork.

AI for Smart Working

27 March 2024

The Session conducted by Mr. Haleem. The session was about the use of the AI used in Generative Pre-Trained Transformer or most commonly known as GPT. He showed how he uses the ChatGPT website and more importantly the paid version (Microsoft Copilot) that existed in the Microsoft 365 suite used by the project team.

He demonstrated how he used Copilot to get information from the web and neatly organise it in table forms and export to formats such as Microsoft word and excel. The demo also showed the capability of the AI to proof read and comment on the grammar and factual accuracy of a news item. Lastly he showed how he uses the tool to create Terms of References. The AI helps to reduce time spent on internet search by doing most of the searching and suggest where important reference materials are.
